

# 25 things

Attached is a sheet listing 25 phrases which are to act as stimuli.

You are to find visual responses to the stimuli presented. You are going on a creative scavenger hunt – one where you will be immediately inspired by some phrases and struggle with desperation by others. This process allows for all of you to have highs and lows within one body of work.

You also will have a time condition today so you will have to work quickly and with some focus and common sense and planning.

The end result is going to be a 5 x 5 picture grid – a formal mosaic which will represent your findings – the collection from your scavenger hunt.

This assignment will focus on instinct and interpretation. In presentation it will show how the sum of a whole is made up of its parts and how those parts are related or not related. Until you build the mosaic you will not really know how you feel you have succeeded at this project.

HINT --- work with those phrases which inspire you immediately. Shoot what is loud and clear and then go back to those which you may be struggling on. Success will breed success, so go from positive to positive until you finally hit a rut.

## **Learning Outcomes**

Understanding the concept of having faith throughout an idea – seeing it come to full form only at the end, in the presentation.

Examining if there is a visual code present.

Basic skill in working with ideas and translating them into visual representations as single entities or a collection of artworks.

Basic understanding to layout and exhibition to enhance the participation of the photographs.

## **Assessment Criteria**

Clarity and understanding through research and development which will have benefits in the next assignment.

Spatial awareness and orientation to light and room placement to shed the best light onto a photograph.
